- 1.) Alluvial gravels meeting the specification for the required 3,000 CYD of “Bulk Fill” are available for purchase from the City of Nulato at \$40/CYD.

- 2.) Bidders should review attached geotechnical report dated 11 July, 2025 for additional information.

- 3.) Heavy equipment and trucks are potentially available to rent locally. Please contact Nulato Tribe (Kari Generous: kgenerous224@gmail.com) and the City of Nulato (Violet Kruger: nulatotreasurer@gmail.com) for a full list of potentially available equipment, vehicles, and pricelist.
- 4.) For information about locally available gravel please contact Violet Kruger, City of Nulato at nulatotreasurer@gmail.com.
- 5.) The Nulato River Quarry is located at 64.70963, -15813222 and is 2.9 miles from the North Fork Bridge construction site.
- 6.) Pricing for diesel fuel and ultra-low sulfur fuel has not been determined for 2026. Please disregard fuel pricing on the original RFP located in the Bid Schedule. Contractor should determine 2026 fuel volume and pricing delivered/stored. Some fuel storage may be available locally, but ultimately delivery and storage should ultimately be the responsibility of contractor. Contact City of Nulato for information on storage options.
- 7.) Local hire is preferred for the North Fork Bridge Construction Project in Nulato Village. Priority will be given to contractors that are able to use residents of Nulato, and in doing so, support local employment, strengthen community capacity, and ensure meaningful participation in the project. Contact Nulato Tribe and City of Nulato for information on local hire.
